

We understand that an LPFM may be able to take proiority to an existing FM translator service. We would hat to see KLOVE off the air. It encourages many in the community and allows us to find out about various local events. There are many people all over the US that greatly benefit from this station and the work they do. It is in the best public interest of all the allow this wonderful programming to continue. There are many who are down and have reached the end of the rope when they happen to hear a song, prayer, verse or encouraging word that suddenly turns their life around. KLOVE and WAY-FM are the only stations my kids listen to - I love the music and it's message and don't like some of the language and song lyrics heard from other radio stations, so KLOVE is our choice. How can we expect a better world when we are broadcasting junk and subjected to some of what is out on the radio waves and tv? How can we fight drugs, alcholism and other addictions when we constantly see this on tv, commercials or hear it on the radio? That is why KLOVE is a wonderful service that is provided to those who are fortunate enough to have found them.
